Earn up to 100% per month on meme coins with a team of professionals!

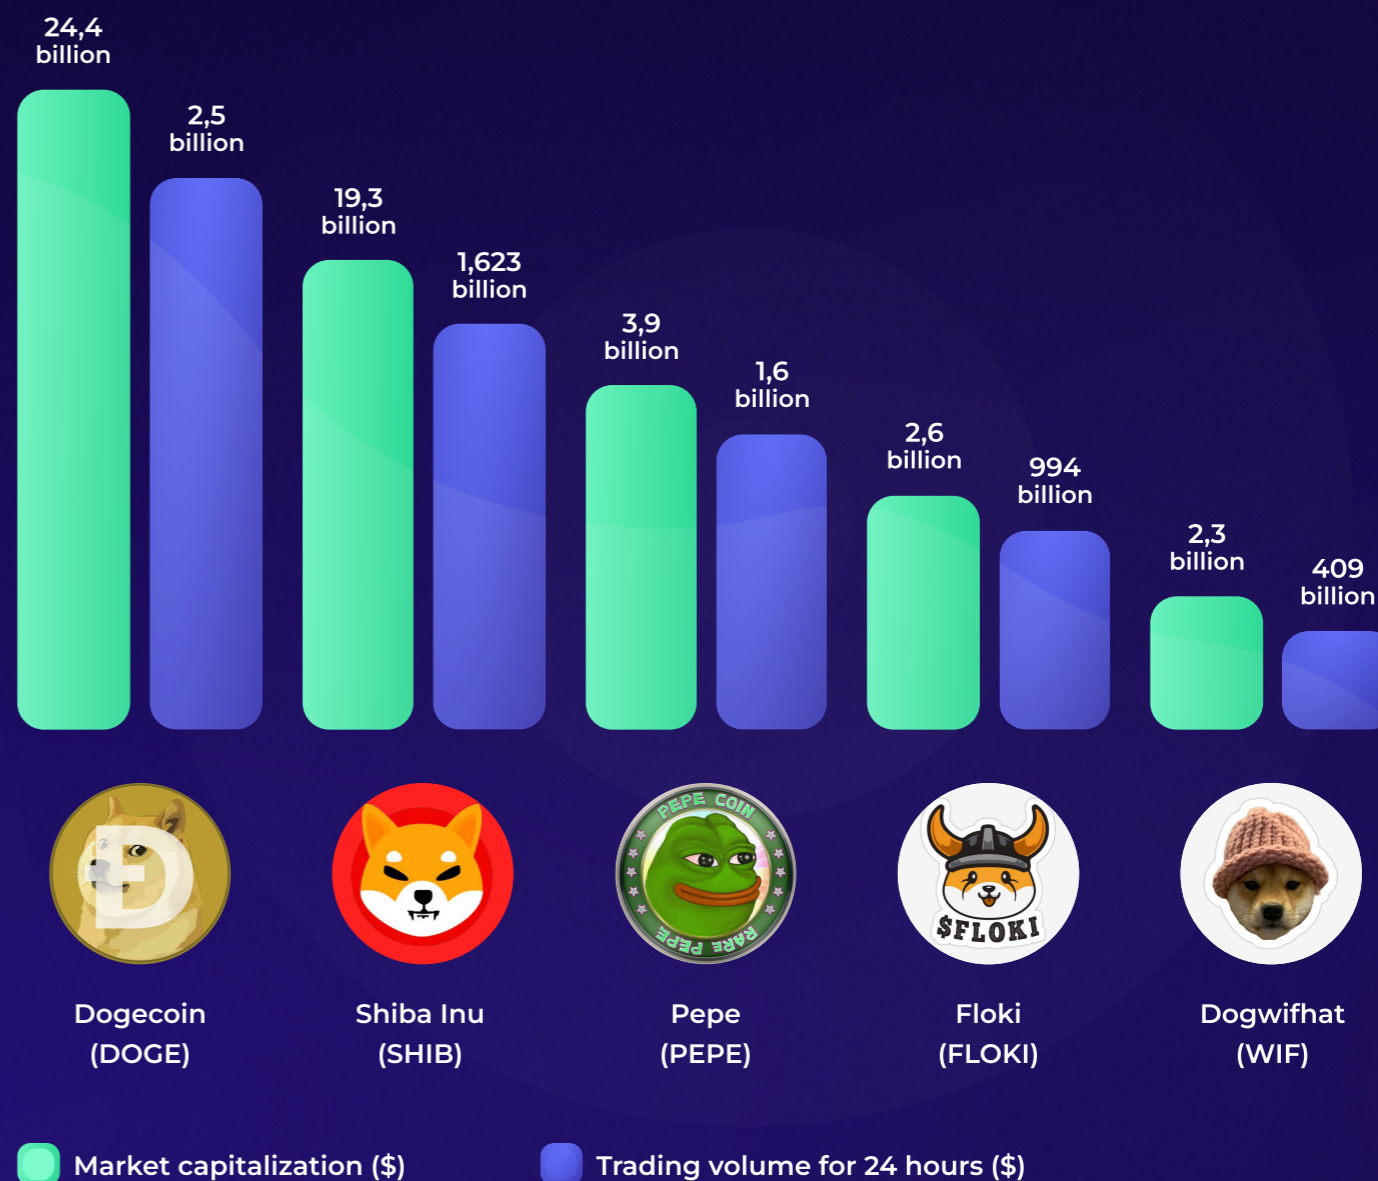

What are Meme Coins?

MEME COINS are digital assets based on blockchain technology that got their name and popularity from memes, internet jokes, or famous characters.

They are a type of cryptocurrency and can be created and traded on various cryptocurrency exchange platforms.

Top 5 Meme Coins in 2024

MEMIX

Pros of Meme Coins

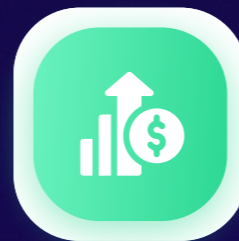

Great for learning about cryptocurrency and how it works.

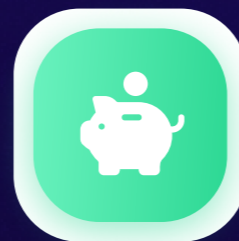

Lucky investors can earn a decent amount of money on the change in the exchange rate of such a currency.

Purchasing a meme asset gives you a ticket to enter a community of like-minded people organized around that asset.

If the project is well-invested in marketing, without expecting to earn money from it through fraudulent manipulations, the value of the meme currency will grow. This means that you will be able to earn money from it without making any effort.

Meme coins are cheaper than cryptocurrency like Ethereum. A fairly inexpensive entry point into the cryptosphere for users just starting to understand it.

MEMIX

Cons of Meme Coins

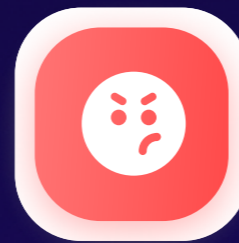

Coins are very volatile, and therefore investors who invest in them risk their money greatly. However, many professional investors are sure: profit and risk are asymmetrical, money can be lost on Bitcoin, while winning back on Dogecoin. And it really works!

For some users, meme currencies are technologically complex, and not all developers of blockchain-based solutions can work with them.

In the community of blockchain enthusiasts, unfortunately, there are not the most honest users who can create meme coins in order to earn money from deceived investors. Scammers are not a new thing for the cryptocurrency universe, but in the case of meme coins, you need to be especially careful.

Meme token liquidity pools can be limited, and small groups of users can control large amounts of meme cryptocurrency. This makes the coins particularly susceptible to schemes that can be used by unscrupulous coin holders (not the issuing companies or developers of the meme currency).

Meme coins may not have an issuer, i.e. a company that releases the coins to the market, or even a community of developers that would be responsible for the security of the currency, its updates, and governance mechanisms.

Registration documents

• Jurisdiction: UK and Hong Kong

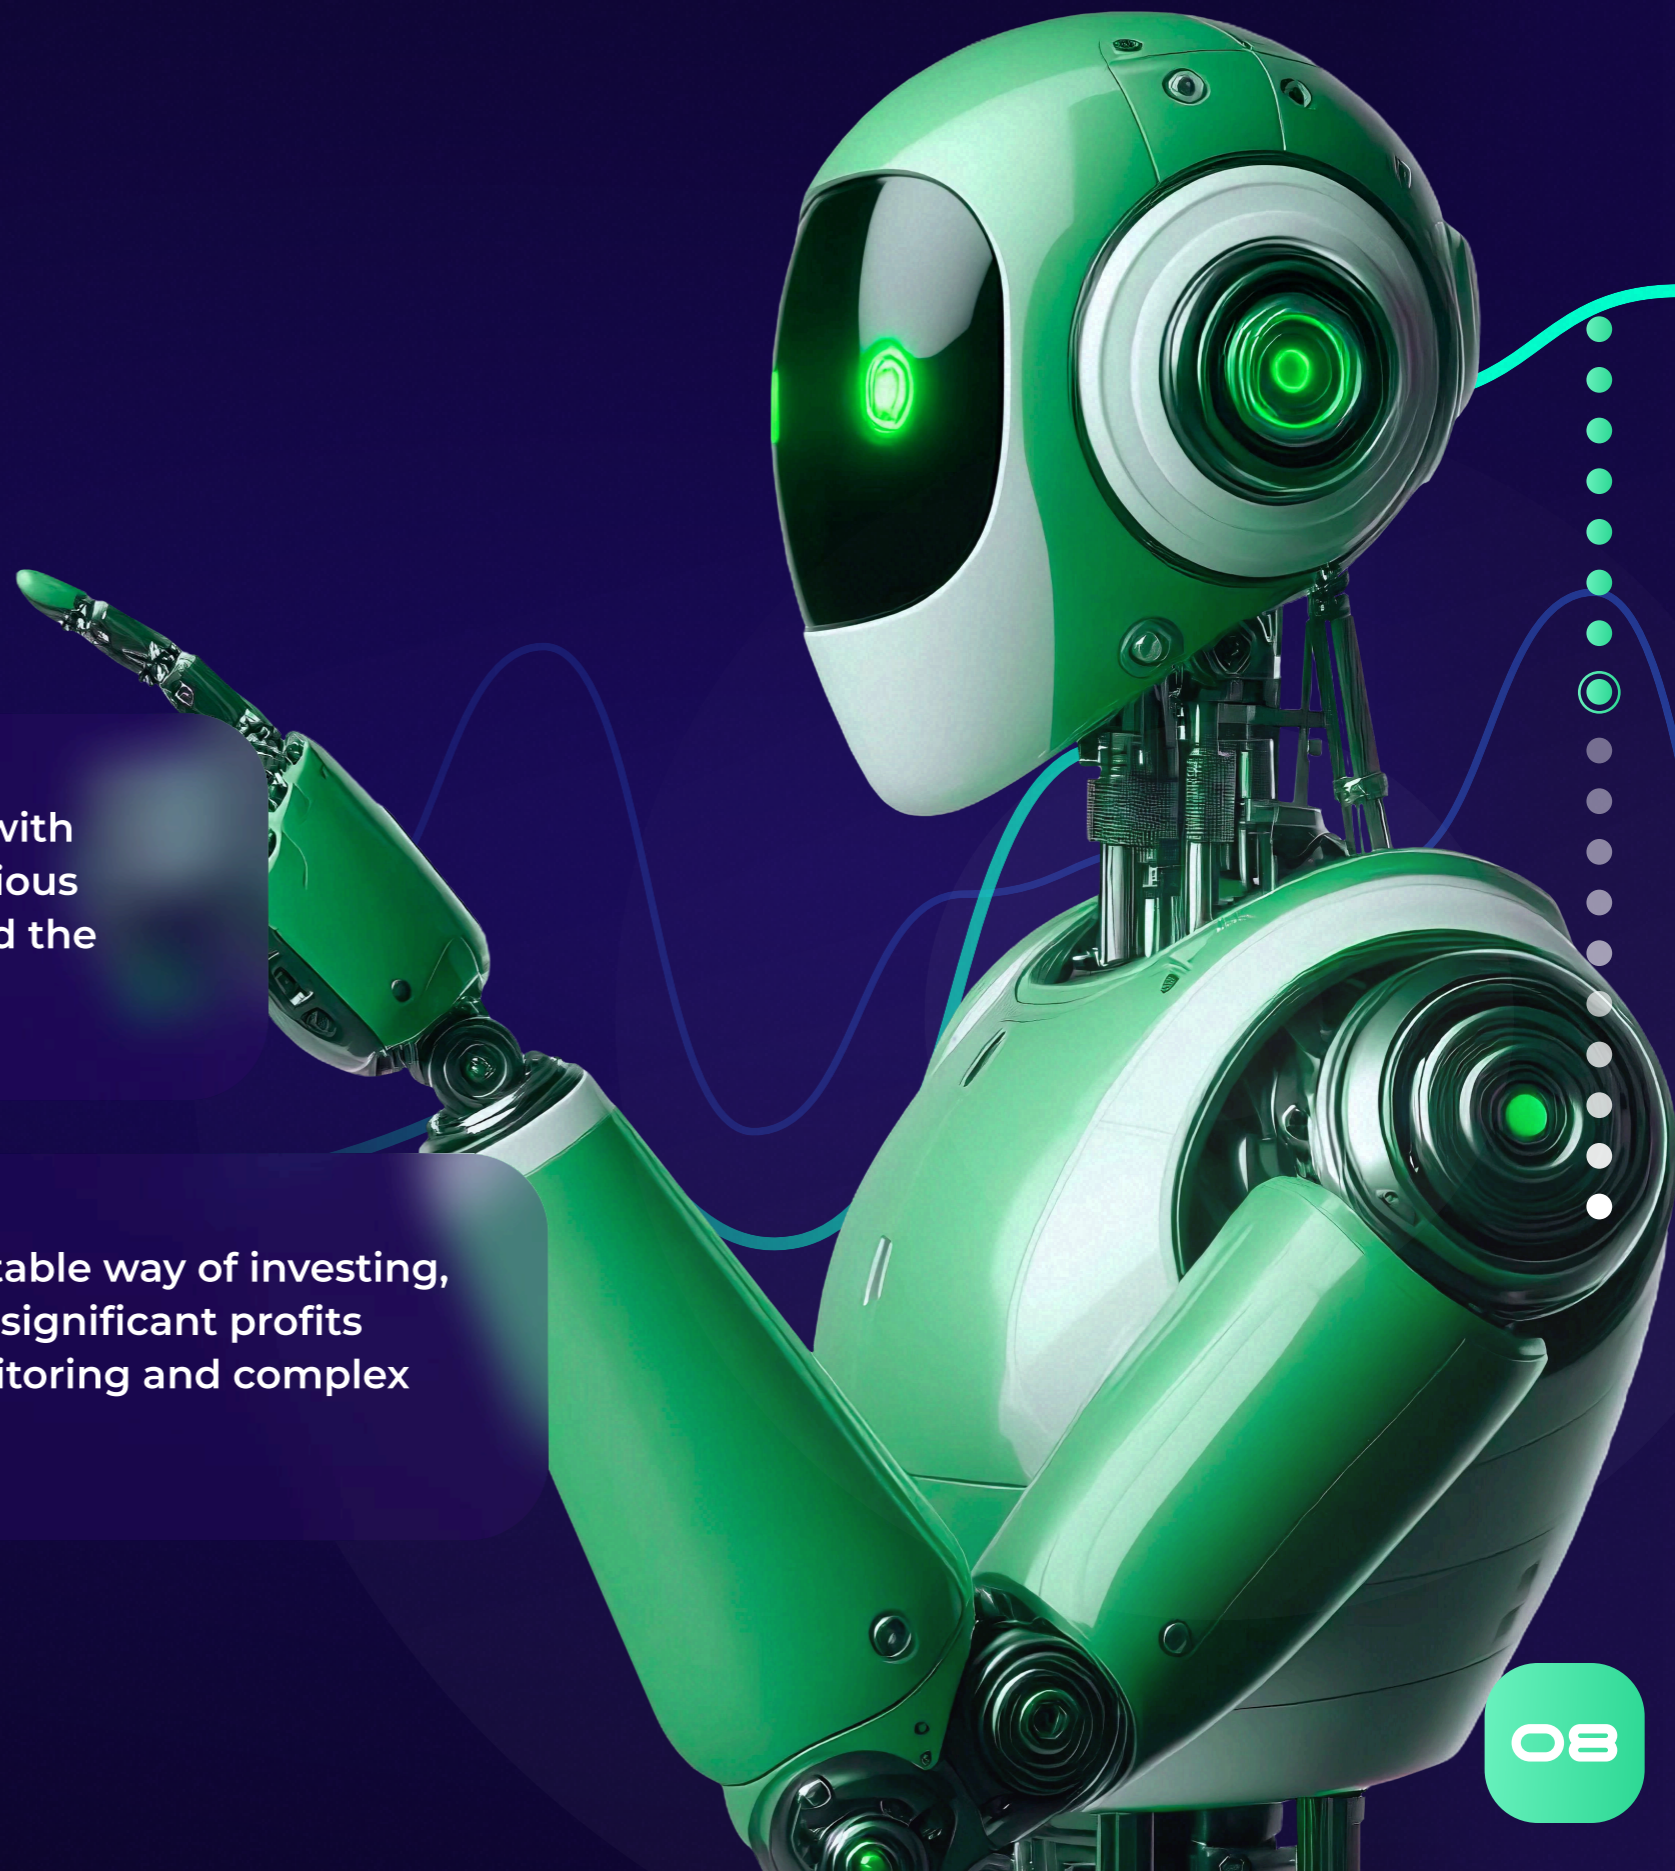

● Trading on Artificial Intelligence. NEURO-BOT

● The specialists of the MeMix company, together with professional international traders working on various exchanges, analyzed all possible risks and created the Neuro-bot.

● The neurobot is a reliable and profitable way of investing, which, if set up correctly, can bring significant profits without the need for constant monitoring and complex market analysis.

MEMIX

• The MeMix neurobot, created for trading meme coins, has the following advantages:

- 01 Artificial Intelligence: Uses advanced machine learning algorithms to analyze the market and make decisions.
- 02 High Speed: Reacts quickly to market changes, allowing you to profit from short-term fluctuations.
- 03 Sentiment Analysis: Measures user sentiment on social media, which is important for meme coins that are often influenced by public opinion.
- 04 Automation: Provides fully automated trading, reducing the need for constant monitoring by the user.

- 05 Customizability: The user can customize the bot parameters to suit their preferences and risk level.

These features make the MeMix neurobot a powerful tool for meme coin trading, combining speed, automation and intelligent market analysis.

MEMIX

Leadership program

When the turnover reaches **\$5,000** from all lines in the structure, the “leadership bonus” function is activated, where the depth of the structure will be **+1**, i.e. from **4** levels of depth, **1%** of the team’s daily income is received daily.

If the leader makes a turnover of **\$10,000** from all lines in the structure, then his 5th line will be activated, that is, there will be a daily income of **1%** from **5** levels of depth

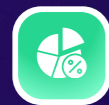

If the leader makes a turnover of **\$20,000** from all lines in the structure, then the “leader bonus” function is activated, where the depth of the structure will be ∞ , that is, income from the daily income of the entire depth.

Ambassador program

Upon reaching a turnover of \$50,000, the partner achieves the status of AMBASSADOR and the platform allocates up to 5% of the total income daily.

If the next leader also reaches \$50,000 then they share 5% between themselves, that is, 2.5% for two and so on, the number of leaders who can receive these % is not limited, since scaling the number of leaders increases the number of active partners and the capitalization of the MeMix project
